Front-end Developer

ABOUT ME

A self-motivated and enthusiastic front-end developer. Learning for me never stop. I'm in middle of a big journey and in currently seeking to join to a creative team to leverage experience with JavaScript to go forward.

SKILLS

HTLM • CSS • JavaScript • ReactJs • NextJs • Typescript • Redux • Redux Toolkit • React Router • React Query • Git • TailwindCSS • Material UI • React Bootstrap • Web3 • Yup • i18next • Firebase • Socket • Vite • Formik • React Hook From • Rest API • NodeJs • ExpressJs • MongoDB • Mongoose • JWT •

EXPERIENCE

Avanitco • Front-end developer • Sep 2022 - Feb 2023

- Developed and designed multi-language user interfaces with support for both RTL and LTR languages. The UI seamlessly adapts to different languages, providing an optimal display experience.
- Enabled web3 integration by implementing wallet connection and management functionality, allowing users to seamlessly sign fully decentralized transactions.
- Active participant in team meetings, contributing to decision-making processes and defining system requirements for future development.
- Conducted in-depth research on the inner workings of decentralized exchanges to gain a comprehensive understanding of their mechanisms and functionalities.

Azarin Noavaran • Front-end developer • Dec 2020 - Sep 2021

- Successfully developed and implemented multiple front-end projects, encompassing user and admin panels with comprehensive rules management capabilities.
- Utilized the i18next package to implement multi-language features, enabling seamless localization across diverse user interfaces. Employed advanced styling techniques to ensure optimal RTL and LTR display based on each language's requirements.
- Refactored codes and modules to improve the functionality and better performance.
- Developed and implemented a customized trading view chat system, leveraging backend data for multiple cryptocurrencies, to display real-time transaction information based on our exchange platform.
- Implemented functionality for web3 like connecting and managing user wallet, signed web3 transaction and trades NFT.
- Developed and maintained a stable socket connection to display real-time cryptocurrency exchange data and facilitate seamless transfers.

Terminol • Front-end developer • Sep 2021 - Oct 2022

- Designed and developed an intuitive and user-friendly interface for the semester management and planning system at Imam Khomeini University.
- Collaborated with a team of developers to gather requirements and ensure the UI met the needs of the university students.
- Conducted usability testing and incorporated user feedback to continuously improve the interface's usability and accessibility.

EDUCATION

2019 - Now • Imam Khomeini University • Bachelor of Computer Engineering
